

Global Health Informatics Technology Standards Summit IV - a Patients view

Ann-Sofie Bergström, RN
SAS Inc; HLS Global Practice

**THE
POWER
TO KNOW®**

What do I need?

The *right* treatment in the *right* time by the
"*right*" people

&

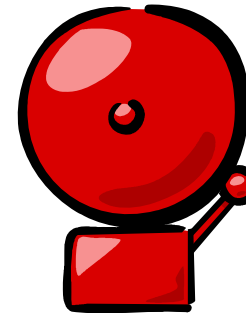

That the treatment is done in a:

- Safe
 - Qualitative
 - Efficient
- } **WAY**

Quality assured data require integrity

- Patient integrity
- Controlled access to data
- Data integrity
- Analysis integrity
- Identity removal, in certain cases

Is this SAFE ?

Evidence Based Decision Making

- **Patient Safety / Error Reduction**
 - Utilize data to uncover trends and patterns in clinical errors;

Urgent Need:

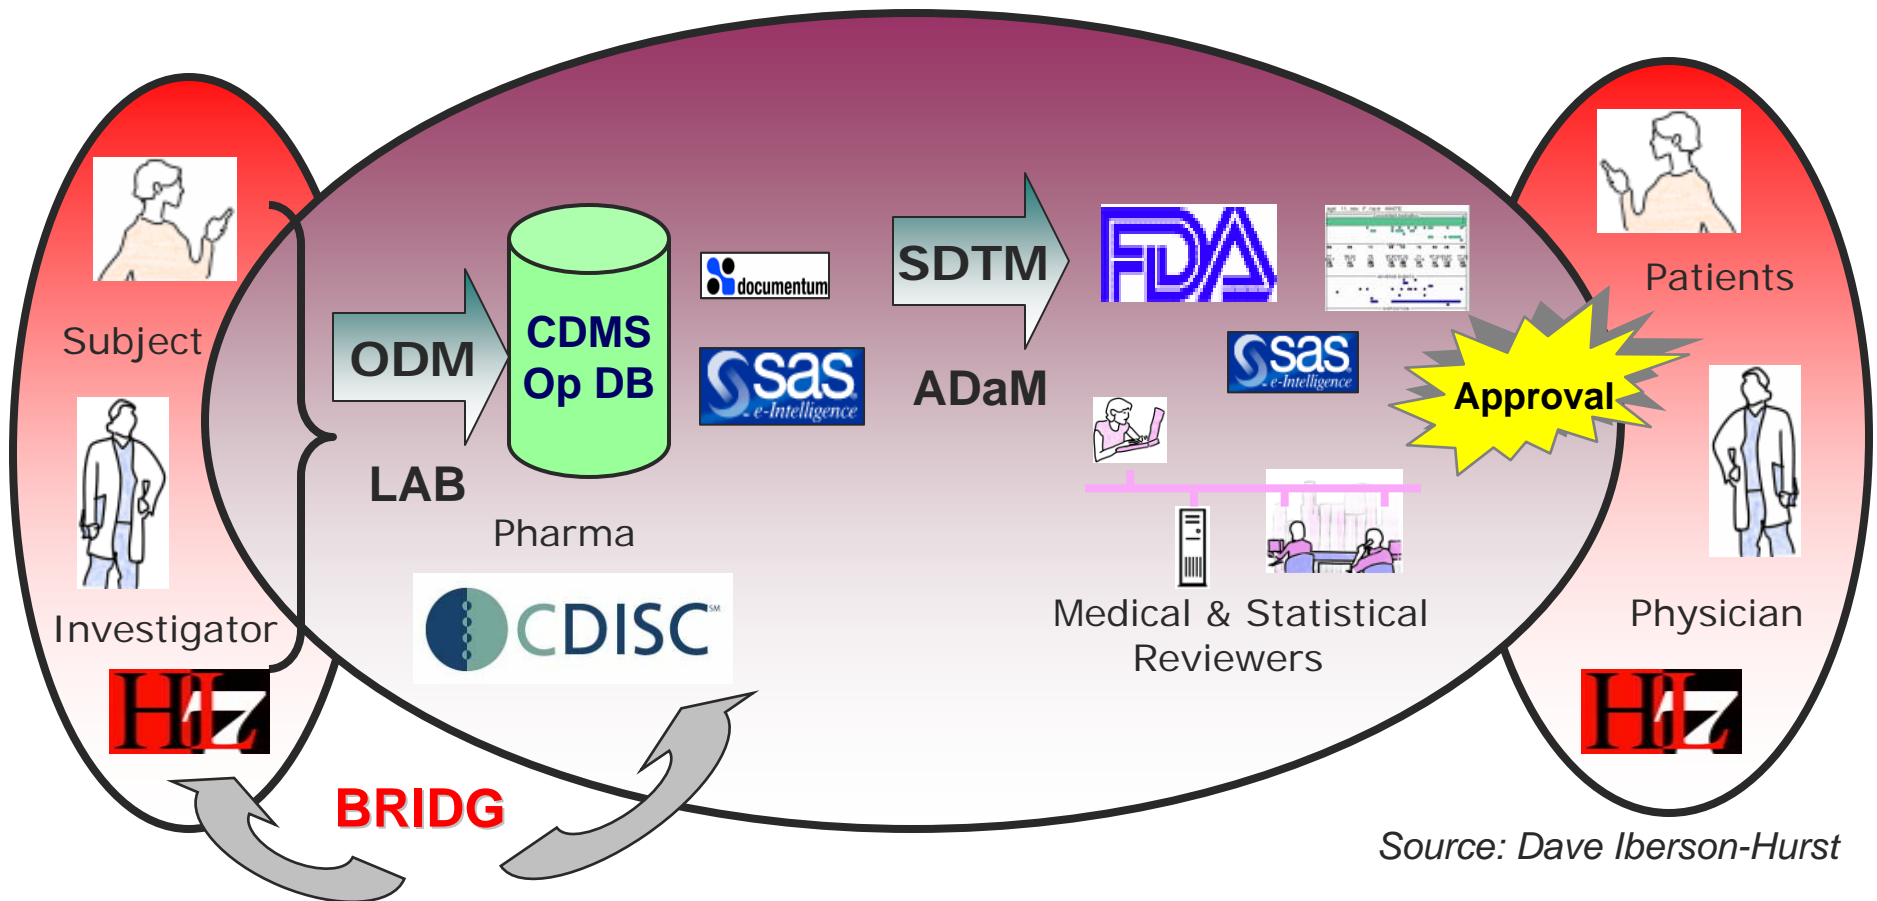

Interoperability !

Why ?

- Get treatment wherever I am
- Be sure that needed data is accessible
- Be sure My data is "Mine"
- That data transfer is secure
- Accesses to the right people

← **Open Data Model - XML based, CDISC and HL7 compliant** →
