

Statement to Congress: A Call for Action

"As CIOs representing healthcare providers across the United States, we have all made the decision to invest in advanced levels of Electronic Medical Records systems. Our practical experience as EMR users has given us insights in how EMRs can benefit healthcare. As such, we believe that EMRs and accompanying change management processes have the potential to improve patient safety, the quality of care delivered, reduce costs, and make interconnected healthcare possible. We ask Congress to use its authority and funding by acting now to increase EMR adoption rates across our nation."

NAME	TITLE	WORKSITE	LOCATION
Timothy Stetheimer, PhD	Senior VP & CIO	AHIS/St. Vincent's Health System	Birmingham, AL
George T. Hickman, CPHIMS, FHIMSS	CIO	Albany Medical Center	Albany, NY
