

Webinar: Implementation Spotlights

Wednesday, June 22, 2011

4-5 PM Eastern

Brought to you by:

Association for Healthcare Documentation Integrity (AHDI)
American Health Information Management Association (AHIMA)
Clinical Documentation Industry Association (CDIA)
Health Story Project
HL7 International
Integrating the Healthcare Enterprise (IHE)

Please note, your line is muted given the anticipated number of webinar participants.

Webinar Purpose

1. Summarize the purpose and approach of the Health Story Project
2. Share examples of the Health Story approach in action
3. Encourage you to consider adoption of the Health Story approach for your own organization

Presenters

**Susan Lucci, RHIT,
CHPS, CMT, AHDI-F**

On behalf of AHIMA

Executive Committee Member
Health Story Project

**Lynn Kosegi,
PMP**

Director, Health Information
Services, M*Modal

Health Story Promoter
Member

Steve Bonney

Clinical Documentation
Solutions, BayScribe

Health Story Promoter
Member

Agenda Review

1. Health Story Project Overview
2. Implementation Highlight: M*Modal
3. Implementation Highlight: BayScribe
4. Summary
5. Q&A

Health Story Project Overview

Health Story Project

- Non profit, industry alliance
- Founded 2007
- Associate Charter Agreement: HL7 The logo for HL7 International, featuring the letters "HL7" in a stylized red and black font with the word "INTERNATIONAL" in a smaller black font below it.
- Sponsor HL7 standards for flow of information between narrative and EMR systems
- Member organizations provide direction
- www.healthstory.com

Health Story Project Members

Organization Affiliates

Promoters

Contributors

Aprima Software - Scribe Healthcare Technologies

Participants

All Type - Arrendale Associates - BayScribe - Chase Transcriptions
DictateIT, Ltd - Dispersive Medical - Documentation Services Group
eMTS - Healthline, Inc. - InterFix - MedEDocs - MD-IT
New England Medical Transcription - Phoenix Medcom
Physicians Medical Group of Santa Cruz County - Sten-Tel, Inc. - Webmedx

Health Story Project

A physician's practical need for fast and easy methods of creating clinical documentation

The enterprise need for structured and coded information capture

Health Story Approach

THE MEDQUEST HOSPITAL
DISCHARGE SUMMARY

PATIENT: DOGOOD, LARRY ADMIT
MR#: A1234567 DIS
ACCOUNT #: 1234567

DISCHARGE MEDICATIONS:
1. ECASA 325 mg po daily (new)
2. Zocor 40mg po daily. (new)
3. Atenolol 100mg po daily (increased)
4. Glucophage 850 mg tab, 1 tab po TID
5. Zyrtec 10mg po daily

DISCHARGE DIAGNOSES:
1. Acute Myocardial Infarction s/p CABG.
2. Cardiovascular collapse
3. Hypertension, NOS
4. Diabetes Mellitus, type II
5. Seasonal Allergies

PROCEDURE: CABG, LIMA->LAD, SVG->Circ, SVG->2/26/07.

HISTORY OF PRESENT ILLNESS: This is a 51 year history of Hypertension and diabetes admitted with chest pain, and hypotension. Please see the H details of admission. He was noted to have non- and positive cardiac enzymes on presentation and data to the U.

Consolidation Project Underway!

1. HL7 Consult Note
2. HL7 Diagnostic Imaging Report
3. HL7 Discharge Summary
4. HL7 History and Physical
5. HL7 Operative Note
6. HL7 Procedure Note
7. HL7 Unstructured Documents
8. HL7 Progress Notes
9. HL7 Continuity of Care Document
10. HITSP/C84 Consult and History & Physical Note Document
11. HITSP/C32 - Summary Documents Using HL7 CCD
12. HITSP/C38 - Patient Level Quality Data Document Using IHE Medical Summary (XDS-MS)
13. HITSP/C48 Encounter Document constructs
14. HITSP/C62 Scanned document

One master
implementation
guide

Health Story supported guides in blue

Benefits

Benefit	Value
Retains patient story	Maintains primary role of documentation to clearly describe and communicate what is going on with patient.
Preserves physician time for clinical care	Makes efficient use of physician time by enabling choice of documentation methods and fosters EMR acceptance
Supports meaningful use	Implements HL7 CDA document standards for electronic exchange of clinical information
Enables data reuse	Structured narrative enables better outcomes reporting, data mining, and decision support
Collaborative approach	Developed by broad array of providers, vendors and IT organizations; Balloted process through HL7 supports harmonization
Better documentation	Supports better coding, DRG optimization = better reimbursement

IN SUMMARY

Actionable Next Steps

1. Providers:

1. Is your documentation vendor set up to deliver CDA documents? If no, when?
2. Is your EHR vendor set up to receive CDA documents? If no, when?

2. Vendors: Check out the requirements here:

www.healthstory.com

Actionable Next Steps

- Join the Health Story Project
- Project is interested in tracking and highlighting implementations
