

INSITES FOR EMERGENCY DEPARTMENTS

Patient Flow Solution

Faced with overcrowding, long wait times and even longer hold times, hospitals want to improve the productivity of their emergency department (ED) operations to move patients from admission to discharge as effectively and efficiently as possible.

Using automatically collected, real-time location data, InSites for Emergency Departments provides visibility into the flow of patients and staff throughout your facility and insight into bottlenecks causing delays in care. Visibility is provided on team view boards and mobile apps, streamlining communication across the care team. Nurses and providers always know what's next and patients receive the care they need sooner.

DECREASE DOOR-TO-DOC TIME

DECREASE WAIT TIME

DECREASE LEFT WITHOUT BEING SEEN RATES (LWBS)

DECREASE DIVERSION HOURS

INCREASE THROUGHPUT

INCREASE PATIENT AND STAFF SATISFACTION

TRANSFORM DATA INTO A VISUAL WORKPLACE

Create a visual workplace for caregivers and staff with live views of patient flows. At any moment, easily see where patients are, where they are in their care and what is needed next.

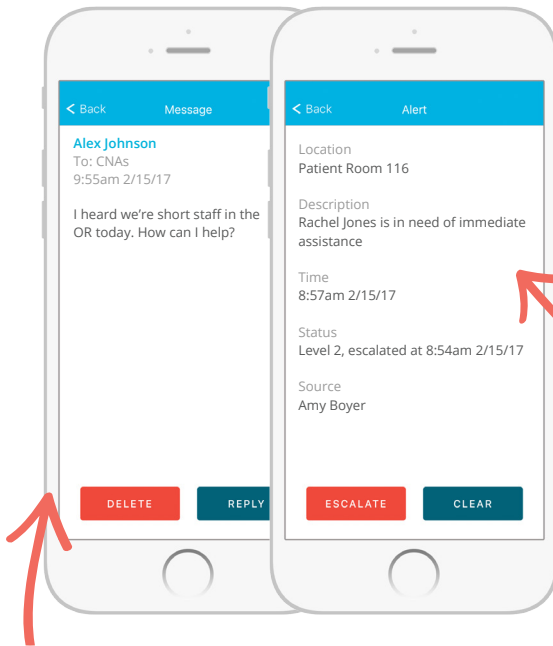

Status Summary								
Name	Status	Location	Milestone(s)		Staff	Last Staff Contact	Workflow Total	
Greg Johnson	Triaged	Hall 1	Post Triage	02m	1	Amy Boyer 8:43am	0h 45m	
Lewis Nance	With Nurse	Exam 116	03m	03m	2	Sally Johnson, Jim Smith	0h 35m	
Abe Carter	With Provider	Exam 117	Provider with Patient 02m		1	Steven Miller	0h 30m	
Henry Wilson	With Provider	Exam 118	Provider with Patient 05m		1	Jayne Sims	0h 30m	
Kari Phillips	With Nurse	Exam 119	05m	05m	2	Carol Jones, Alex Johnson	0h 55m	
John Massey	Checked In	ER Waiting	Check In Waiting	20m	1	Robbie Snyder 8:25am	0h 24m	
Jenny Fritz	In Imaging	Radiology CT	In Imaging		1	Joe Holt	0h 56m	
Jackie Davis	Checked In	ER Waiting	Check In Waiting		1	Robbie Snyder 8:37am	0h 12m	
Curt Parker	Checked In	ER Waiting	Check In Waiting		1	Robbie Snyder 8:45am	0h 05m	

Length of patient wait time

Last staff contact with the patient and when

InSites for Emergency Departments has built-in security, can be configured to best enhance your workflows, and scales across entire healthcare enterprises. Our open technology integrates with EHRs and other healthcare IT systems.

STREAMLINE CARE COORDINATION

Improve coordination of care teams with at-a-glance visibility into the location of staff, nurses and physicians. Pinpoint team members with automatically updated views, and quickly communicate with preset messages and visual alerts.

Send and escalate alerts needing urgent attention

Send messages directly to simplify communication

"RTLS helps us predict workflow. It helps add control in an area of variation. It lets people know when the next patient is in the room. It's not guess work, it's preparation. It helps us create leading indicators to predict what patient satisfaction is going to be at the end of the month, based on things such as wait time."

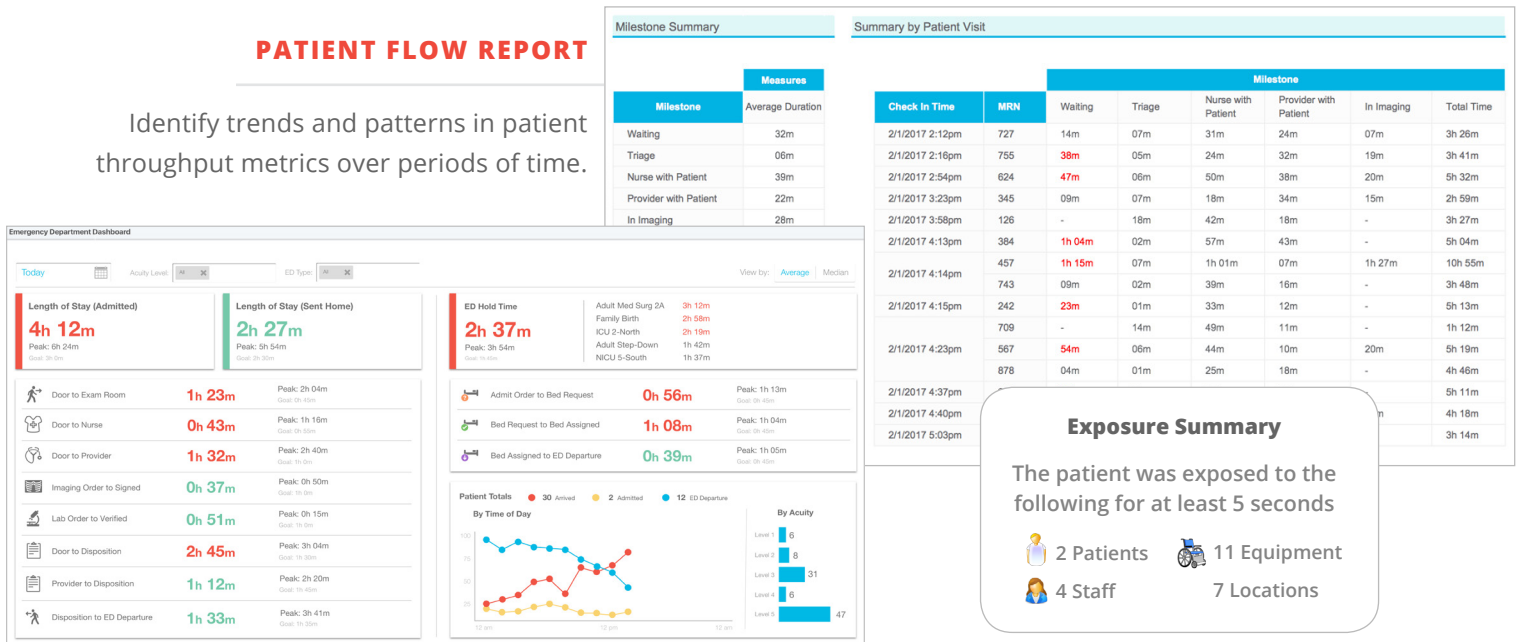

- HOSPITAL CEO

SEE THE BIGGER PICTURE

InSites for Emergency Department's business intelligence solution includes accessibility to operational data, historical trends and advanced reporting to measure key performance indicators and drive continuous process improvements.

PATIENT FLOW REPORT

Identify trends and patterns in patient throughput metrics over periods of time.

EMERGENCY DEPARTMENT DASHBOARD

Get at-a-glance insight into key performance measures such as Length of Stay (admitted and sent home), ED Hold Time, Door to Exam Room, Door to Nurse and more.

INFECTION EXPOSURE REPORT

Reduce the spread of infection by automatically tracking all interactions between patients, staff and equipment.
