

INSITES ASSET MANAGEMENT

Asset Management Solution

Finding equipment in a complex healthcare environment can be difficult. This complexity can also impact purchasing decisions, which are often made based on incomplete or subjective data. Equipment owners need reliable tools to effectively manage the inventory, distribution and purchase of medical equipment.

Using automatically collected, real-time location data, InSites Asset Management provides visibility into the location, status and utilization of mobile medical equipment. You'll have the data to streamline equipment processes and the intelligence to effectively manage equipment budgets.

**IMPROVE

**FEWER STOCKOUT
SITUATIONS**

FIND EQUIPMENT QUICKLY AND EASILY

Eliminate time spent reacting to requests from caregivers for needed equipment. Take a proactive approach in equipment management and increase productivity.

RETRIEVE AND REPLENISH EQUIPMENT EFFICIENTLY

Dirty, in repair and hoarded equipment is counterproductive to streamlined operations. Ensure inventory levels are maintained with proactive retrieval and replenishment processes.

MAKE SMARTER PURCHASING DECISIONS

Right-size equipment inventories and stop unnecessary spending. Analyze utilization data for both owned and rented equipment to make smarter purchasing decisions and accurately allocate equipment to where it is needed most.

InSites Asset Management has built-in security, can be configured to best enhance your workflows, and scales from a single facility to an entire healthcare enterprise. Our open technology integrates with CMMS, mobile communication, ERP, and real-time location systems (RTLS) sensory networks.

"Finding the exact items went from being nearly impossible to locating these items in seconds with RTLS"

CUSTOMER RESULTS

Over **\$3.5M** in savings by eliminating redundant equipment purchases and avoiding unnecessary costs.

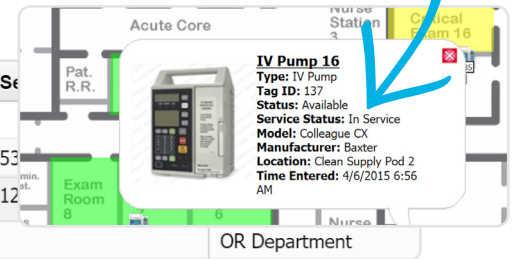

LOCATE AND OPTIMIZE EQUIPMENT

View the real-time location of mobile medical equipment and staff via smart-phone, tablet or desktop computer and save favorite searches for quick access. Integrate with existing equipment systems to add valuable context to data. Locate equipment by manufacturer or model for recalls or maintenance.

Learn details for individual pieces of equipment

Name	Type	Status	Location	Se
Bed Lift 1	Bed Lift	In Use	Exam Room 10	
Bed Lift 2	Bed Lift	In Use	Exam Room 33	53
Bed Lift 3	Bed Lift	In Use	Exam Room 40	12
Case Cart 1	Case Cart	Available	OR Corridor	

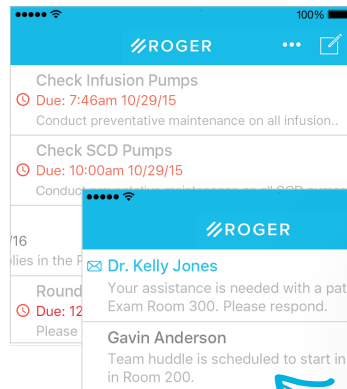

Filter and sort by unit, department, facility or enterprise for analysis and comparison

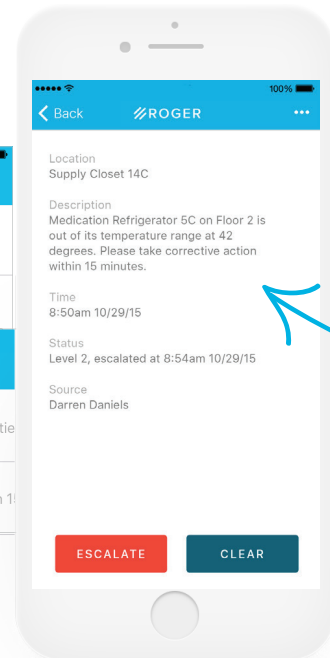

STREAMLINE STAFF COMMUNICATION

Equipment owners are almost always on the go. Route requests and urgent alerts to mobile devices and respond easily in the app.

See a list of tasks and take them out one by one.

Send messages directly to simplify communication

Receive alerts when equipment needs urgent attention

SEE THE BIGGER PICTURE

InSites Asset Management's business intelligence solution provides direct access to your operational data, historical trends and advanced reporting to measure key performance indicators and drive continuous process improvement. Leverage InSites Reporting Library's standard, configurable reports, or use InSites data with your preferred reporting tool.
