

# Expand your view

Ambulatory isn't just about seeing the patient in the physician's office. You need to see the patient's complete story — where they've been and where they are going next — to deliver the most appropriate care. With MEDITECH's Expanse EHR, you can. Access data from acute, home health, behavioral health, long-term care, and beyond, presented just the way you need it. No more walls, no more limits.

## Practice medicine (not computer science)

Stop spending more than half your work day interacting with the EHR and put your focus where it belongs — on patients. With its mobile, flexible, and intuitive design, MEDITECH's Ambulatory solution won't slow you down or get between you and your patients. They'll be happier. You'll be happier. It's time to get back to practicing medicine.

The screenshot displays the MEDITECH Expanse EHR interface for a physician named Kirk Benson. The interface is divided into several sections:

- Top Navigation:** Includes icons for 'Expand', 'Home', 'Workload', 'Compose', 'More', 'Settings', and 'Suspend'.
- Header:** Shows the physician's name 'Kirk Benson' and a search bar labeled 'Find Patient'.
- Schedule:** A calendar view for February 5, 2018, showing a list of appointments. The appointments include:
  - 8:00: Group Meeting (Norwood Physician Office)
  - 8:30: Daniel Burchett (Back pain, 44 M, Departed)
  - 9:00: Lisa Palmer (Abdominal complaints, 41 F, Pre-Depart Room 4, Draft)
  - 9:30: Keith Bauer (Routine Well Exam, 50 M, Return Room 2, Draft)
  - 10:30: Ruby Davis (Discharge Follow Up, 68 F, Video Waiting Room)
  - 11:00: William Brewster (Diabetes, 56 M, Intake Room 1, Pending)
  - 11:30: Chris Schroeder (Hypertension, 48 M, Booked)
  - 12:00: Unavailable (Kirk Benson, MD)
  - 12:30: Xin Wong (Respiratory complaints, 7 F, Booked)
- Workload:** A section titled 'Recently Accessed' listing patients and their visit dates:
  - Davis, Ruby (01/18/18)
  - Blake, James (01/13/18)
  - Burchett, Daniel
  - McAndrew, James (01/17/18)
  - Blake, George (01/18/18)
  - Beachum, William (01/05/18)
  - Zamorono, Caroline (01/13/18)
  - Holland, Sara (01/13/18)
  - Bradley, Alex (01/12/18)
  - Schroeder, Chris
  - Palmer, Lisa (01/15/18)
  - Campbell, Jack (01/16/18)
  - Johnston, Alexandra (01/16/18)
- Quick Links:** A list of links including 'Hospital Intranet', 'Vaccine Information Statement', 'Practice Analytics', 'AAFP', and 'CDC'.

# The power of one

We bring it all together for your ambulatory practice: One EHR across all care settings, ensuring a complete picture of health for each of your patients. A single schedule, combining your appointments across settings, rounding schedule, meetings, and more — all in one place. And a single patient bill for all care, wherever it occurred. Add to this accelerated eligibility checking, streamlined referral management, and advanced revenue cycle tools, and your practice will be running at peak efficiency.

# A new EHR for a new era

Experience what a modern EHR should be: intuitive, fast, and easy to use. Expance takes full advantage of mobile technology, untethering you from your desktop so you can tap and swipe through your charts more efficiently. Why shouldn't your EHR be as easy to use as your favorite apps?

# Go team!

Whether you're a physician, nurse, PA, NP, or any other member of the care team, you need an ambulatory solution that supports a team approach. Expance improves communication and care coordination, with secure messaging and texting, multidisciplinary care plans, and dynamic patient registries for tracking patients as they cross settings. A unified patient record with robust tools for care coordination ensures that your team is always working from the same playbook.

# A higher level of care

With our Ambulatory solution, you can do more than just serve the patients you see that day. Take your care up a level and positively impact entire populations with dynamic patient registries — responsive browser-based lists that are updated the moment data in the EHR changes. Sort patients by common characteristics, quickly identify problem areas, and intervene before minor issues become serious. It's the tool you need to keep your healthy patients well and manage your chronically ill patients more effectively.

# Make it yours

In healthcare, one size rarely fits all. You need a personalized EHR designed around your unique workflows and practice patterns, with your own widgets, preferences, and shortcuts built in. Our Ambulatory solution includes out-of-the-box content across more than 40 specialties, including documentation templates, protocols, order sets, and much more — all based on the most current clinical evidence. You take it from there and make it your own. The result: lower stress, higher efficiency, less burnout. That's better for you and your patients.
