## The operating system for your lab

### One complete solution

LabOS offers a unique and complete solution, integrating all of your laboratory departments, including Clinical Pathology, Microbiology, Anatomic Pathology and Genetics into a single database. A comprehensive product suite, based on a single set of catalogs and rules, drives the entire process from result review and order entry at the clinic, through the lab's internal processes and client services, all the way back to result delivery and billing.

### Superior service for your clients

LabOS ensures that you provide your customers the superior service they deserve. With a unified system that is patient-centric, your client services department will provide superior service, saving your clients precious time by avoiding multiple forms or answering the same questions more than once. Clearly presented lab results and orders that are accessible from any place on any platform, will lead to faster and better decisions, matched by a lightning fast high quality lab service. Support for multiple result delivery policies and methods, together with client-tailored result report formats and scheduled summary reports, means that you provide your clients with all of the information they need, wherever and whenever they need it.

### LIS as a service

We believe your LIS should work for you, not the other way around. LabOS's unique, elastic design architecture offers an extremely scalable, easy to manage solution that can be hosted in a private or public cloud. LabOS's virtual design enables it to scale easily, from small hospital labs to large networked ACO's, utilizing multi-site mode to handles tens of thousands of requisitions across a network of labs. A cloud solution means that there is no need to purchase expensive equipment and worry about maintenance and extensibility. With LabOS, you will receive LIS as a Service. We'll take care of the rest.

### Automation

Providing quick turnaround results in the modern lab, means making the most of automation. LabOS excels in automating work processes by applying custom logic that ensures consistency and compliance with lab protocols. Extensive support for preanalytical and analytical instruments, efficiently routes work in the lab while speeding up the work processes and reducing human error. Full integration of quality control, including live patient data based controls, patient results delta checks, and results cross checking, supports maximal auto-validation while ensuring unwavering quality. The system can automate the procedures of samples receipt confirmation, results approval, results delivery, and more.

## User friendly

We understand that time is valuable for lab managers and technicians. LabOS was created with the workplace and users in mind, and lives up to their expectations of a modern computerized system. With an interface that is task driven and tailored to the users' needs, it focuses on simplicity, efficiency, and the availability of information, reducing human error and saving time. But just as important is the ease of use that the system affords and maintains, even after intensive use.

## Flexibility

Your laboratory has unique requirements and ways of performing tasks. Your workflow varies from one department to another, from one workbench to another, and especially between users. LabOS will help multiple users complete their different workflows as quickly and easily as possible. Customizable menus, views, and workflow settings enable technicians to optimize efficiency in the workplace.

**Complete solution in a single database**

**Includes CP/AP/Genetics & Billing**

**Scalable to any size**

**Multi-Site/ Multi Network support**

**Patient-centric**

**Elastic cloud design**

**Interface engines included**

**Multi-level permission management**

**Fully integrated quality control**

**Complete support of reference labs**

## NeTLIMS - a boutique LIS vendor

### Experience and expertise

Twenty years of international experience in developing and implementing Laboratory Information Systems for clinical laboratories, has established NeTLIMS as best of breed among LIS providers. Over these years, we have accumulated many impressive successful installations, delivering solutions to large laboratories and multi-site networks with unique and complex needs.

### Innovation

As an innovative company and industry leader, our aim is to leverage our technology to enable laboratories to get the most out of their facilities by attaining maximum efficiency and focusing on business growth.

### Partnership

The success of our partners is our number one priority, which is why we are committed to providing the best possible response to all requests and inquiries. Our teams accompany the customers on site, from the beginning of the installation process to its successful completion. Our goal is to make the implementation process as smooth as possible.

### Service oriented

As a boutique company, we pride ourselves in providing personalized service of the highest standards, by catering to the specific needs of each laboratory that we serve.
