**Digital Health**

Most health systems plan to invest $10 million or more in digital health programs.

**Artificial Intelligence and Machine Learning**

Health systems generally see the benefits of AI/ML over downsides.

**Financial Health**

68% of respondents will use digital technologies to support or augment health systems.

Respondents indicated the need for changes around reimbursement, including increasing payments, simplified documentation, and health systems will have the highest level of AI/ML involvement looking ahead to 2025.
