Health Data, Technology, and Interoperability: Certification Program Updates, Algorithm Transparency, and Information Sharing (HTI-1) Overview

Revised Timeline for Implementation of New and Updated Standards and Certification Criteria, and timeline for reporting to Insights Condition EHR Reporting Program

- **2024 Requirements for Certification**
  - By December 31, 2024:
    - Certified API Developers must publish their customers' service base URL information (FHIR Endpoints) in accordance with approved standards
    - Certified developers of Health IT and Health IT modules certified to current clinical decision support criterion must:
      - Update their certificate clinical decision support to the new criterion for Decision Support Interventions criterion.
        - Delays in the implementation of other certification requirements were issued to allow developers of Health IT to focus on DSI during the first year of revised certification requirements.
      - Provide updated functionality of decision support interventions as required in the final rule to customers.

- **2025 Requirements for Certification**
  - On January 1, 2025:
    - Decision Support Interventions criterion officially replaces Clinical Decision Support criterion in certification.
    - "Assurances" Maintenance of Certification requirement for decision support interventions begins.
  - By December 31, 2025:
    - To receiver certification, health IT developers must update and provide to their customers certified health IT that conforms to new and revised standards and certification criteria included in the final rule.

- **2026 Requirements for Certification**
    - January 1, 2026
        - All HTI-1 updated standards in certification criteria are required for certification.
    - January 1, 2026-December 31, 2026
        - Health IT developers must collect the data required for the Year 1 Measures (see below) for the Insights Conditions Reporting Program to maintain certification.

- **2027 Requirements for Certification**
    - January 1, 2027-December 31, 2027
        - Health IT developers must collect Year 1 and Year 2 measures for the Insights Condition reporting program.
    - July 1, 2027
        - Health IT developers must submit 2026 measure data for Year 1 measures for the Insights Condition reporting program.

- **2028 Requirements for Certification**
    - January 1, 2028-December 31, 2028
        - Health IT developers must collect Year 1, Year 2, and Year 3 measures for the Insights Condition reporting program.
    - July 1, 2028
        - Health IT developers must submit 2027 measure data for Year 1 and Year 2 measures for the Insights Condition reporting program.

- **2029 Requirements for Certification**
    - January 1, 2029-December 31, 2029
        - Health IT developers must collect all measures (see below) for the Insights Condition reporting program.
    - July 1, 2029
        - Health IT developers must submit 2028 measure data for Year 1, Year 2, and Year 3 measures for the Insights Condition reporting program.
