## APPLICATIONS AND TECHNOLOGIES

### Putting A Personal Health Record to the Pandemic Test

Wednesday, August 11 at 10:00 AM - 11:00 AM PST

Venetian, Marcelllo 4501

In its efforts to combat the spread of COVID-19, early in the summer of 2020, the State of Delaware implemented a testing program at several Walgreens locations throughout the state. With many employers requiring printed proof of negative status before allowing a return to work, the State of Delaware's epidemiologists found themselves spending inordinate amounts of time drafting and mailing letters to requesting patients. In July 2020, the Delaware Division of Public Health approached Delaware Health Information Network to leverage its personal health record, Health Check Connect, for consumers to both see and print their COVID-19 results. DHIN's personal health record service, while several years old, had little mainstream adoption and comparatively few active users. Would an underutilized and subsequently underfunded service meet the challenge for thousands of new users in the course of several days?

# Digital Health Transformation

Your Blueprint for Digital Health Advancement

## Governance & Workforce

Build governance to support sustainable workforce using outcomes data.

## Interoperability

Flow data seamlessly across the health system in real-time.

## Predictive Analytics

Proactively prioritize population health outcomes, informed by robust analytics, with real-time tracking.

## Person-Enabled Health

Use outcomes data to inform design, implementation and scalability of care innovations that are personalized to the unique individual.

Join us for an education series on **Digital Health Transformation.**

Explore how to create true transformational change, identify challenges in your health system, and define solutions to begin your digital journey.

Learn about real outcomes that drive value for the populations you serve.

Dessert Reception

# HIMSS21 Health and Safety Hub

Welcome to the HIMSS21 Health and Safety Hub. This webpage is regularly updated with information about plans for health and safety protocols for attendees, exhibitors and staff on-site at HIMSS21.

HIMSS is monitoring the evolving public health guidance regarding large gathering settings and will continue to provide updates and additional guidance. HIMSS continues to ask all attendees, exhibitors, and HIMSS staff to follow all applicable regulations and make informed choices about travel, onsite, and external engagement.

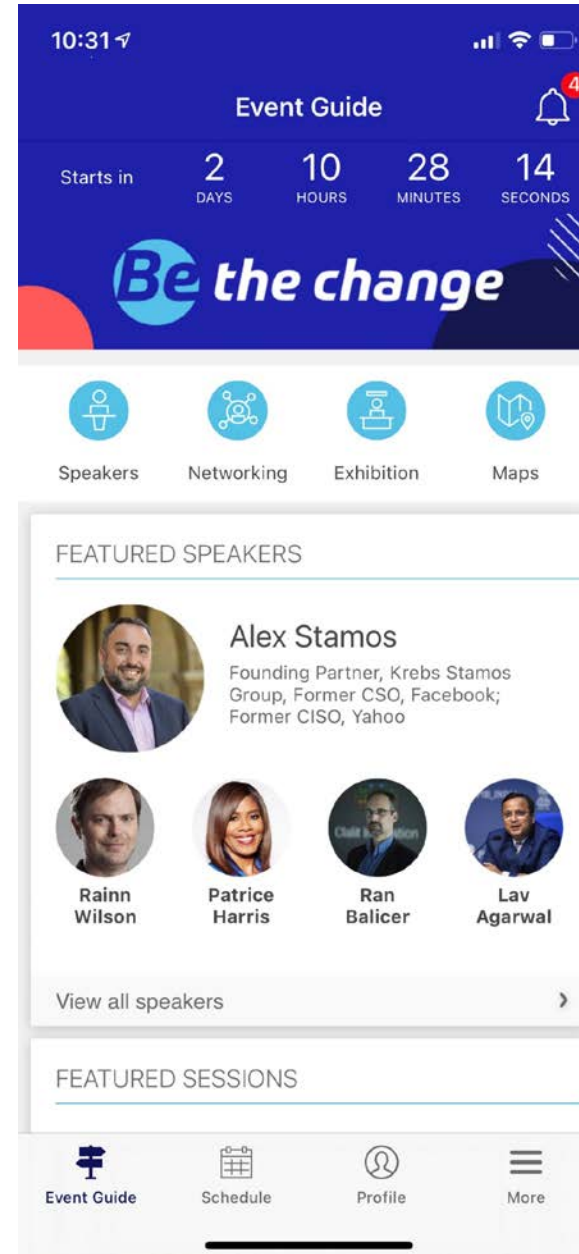

## \*\*\* JULY 28 UPDATE: MASKS WILL BE REQUIRED \*\*\*

On Tuesday, July 27, US Centers for Disease Control and Prevention (CDC) issued updated guidance recommending fully vaccinated people wear masks in public, indoor settings to help prevent the spread of the Delta variant and help protect others. Additionally, on July 27, the Governor of Nevada issued Emergency Directives 045 and 047 (full text can be found via the links [here](#)). On the same day, the Nevada Gaming Control Board adopted guidance stating “everyone, regardless of vaccination status, should wear a mask in public indoor settings in areas of substantial or high transmission.” Clark County is specifically identified as an area subject to this new guidance.

In alignment with applicable guidance from the CDC, the Governor of Nevada, the Southern Nevada Health District guidance, the Clark County Commissioners, and the Nevada Gaming Control Board, masks will be required on the HIMSS21 Campus.
