

TIGER Initiative eHealth Toolkit

This toolkit has been curated from essential Technology Informatics Guiding Education Reform (TIGER) Initiative resources and tools — inclusive of major global projects it has led (TIGER International Competency Synthesis Project) and collaborated on (EU*US eHealth Work Project funded by European Commission’s Horizon 2020 research and grant innovation program). Content will be refreshed as it evolves. With an interdisciplinary scope, this toolkit has something for all roles in global health informatics, healthcare, information & technology and education.

SKAD

25 question assessment tool to determine digital skills level

HITComp

Database of digital skills and IT competencies for many roles in healthcare

Global Case Studies

22 studies on eHealth education and training for workforce development

TIGER VLE

Subscription-based interactive, online Health IT education platform

Competency Grid 1.0

Global Health Informatics Competency Recommendation Framework 1.0—nursing focused

Competency Grid 2.0

Global Health Informatics Competency Recommendation Framework 2.0—interdisciplinary focused

IWP

Interactive Website Platform featuring online eHealth information and resources.

IEDM

Interactive education demonstrator modules focused on [cybersecurity](#), [foundational curriculum course](#) and [HITComp](#).

TIGER/VLE Marketing Toolkit

Marketing tools to promote TIGER/VLE global workforce development resources

TIGER ICSP

Project provides background on health IT competencies through global case studies, survey responses, and recent

EU*US eHealth Work Project

Horizon 2020 project/resources created to support the global eHealth workforce with a [foundational curriculum course](#).

TIGER Informatics Definitions v3.0

Document defining core health informatics terminology last published in 2018.
