

AMAM

HIMSS SOLUTION

A holistic framework and strategic roadmap to analytics maturity

The Adoption Model for Analytics Maturity (AMAM) is an international eight stage (0-7) model measuring the capabilities your organization has gained from technology and surrounding processes. Our AMAM services are designed to progressively measure and advance your organization's analytics capabilities to improve healthcare delivery.

Why AMAM?

From actively managing population health, to reducing readmissions and their associated costs, digitized medical data is helping healthcare organizations enhance the value of care. A strong analytics foundation ensures that data can drive and inform the decision making process in a significant way. Improve operations, enhance quality of care and see increased return on your health IT investment with HIMSS assessment and strategy services.

- Structured, prescriptive assessment to assist in developing and advancing your analytics strategy.
- Determine your own path to analytics maturity with guidance from industry experts.
- Clearly defined framework that is defensible, flexible and vendor neutral.
