DIAM

HIMSS SOLUTION

A strategic roadmap to digital imaging maturity

The Digital Imaging Adoption Model (DIAM) is an eight stage (0-7) model that provides guidance for imaging and IT experts to identify and adopt the right digital strategy and improve health outcomes for patients.

Why DIAM?

In the complex and continuously evolving environment of hospital imaging departments and imaging centers there is a distinct need to deliver medical imaging securely, through the right channel, with the right context, at the right time to the right person. Numerous changes from the move to value-based care and increased use of mobile devices impact the way we use digital imaging. DIAM allows you to identify and adopt the right digital strategy and improve health outcomes for patients.

- Assess the maturity of IT-supported processes in medical imaging for both hospitals and diagnostic centers.

- Imaging-service agnostic international model that is valid for all types of medical imaging.

- Utilize more than 100 indicators from multiple focus areas such as software applications, image capture, distribution and viewing, imaging governance, clinical decision support, imaging analytics, or patient engagement.

Benefits to Healthcare Leaders

Digitize

Move toward a fully digitized imaging IT environment based on a roadmap created by industry experts from globally recognized organizations in the world of health IT and imaging.

Benchmark

Compare your imaging-IT progress over time with peers from your region, your country, or across the globe, based on a standardized and vendor-neutral assessment.

Support

Use the results of the DIAM assessment to identify key opportunities for improvement, drive and support your IT strategy and build alignment with the overall business strategy of your organization.

Announce

Recognition of your accomplishment at a HIMSS event, promotion of your organization's case study, and use of the DIAM Stage 6 & 7 logo on your website.

Progress to Stage 7 with the DIAM Toolkit

DIAM Gap Assessment

Take part in the DIAM Evaluation and get your DIAM Baseline Score and Gap Assessment.

DIAM Validation

Review and confirm your organization's progress with onsite validation from our team of industry experts.

DIAM Strategy

Move forward strategically with an onsite strategy session that will guide your team to successful digital imaging strategy implementation and a roadmap to Stage 7 achievement.

DIAM Education

Do you need more information about the maturity model? Get an expert presentation directly from HIMSS with a deep dive into key focus areas to ensure strategic alignment and level-set your organization on digital imaging concepts and strategy.

Ready to get started? Email us at info@himssanalytics.org or visit www.himssanalytics.org/DIAM for more information

HIMSS offers information and technology frameworks that assist regulatory bodies and healthcare providers in making lasting improvements in efficiency, performance, and care outcomes.

With a suite of Maturity Models led by flagship model EMRAM, HIMSS provides prescriptive frameworks to healthcare organizations allowing for global comparability, benchmarking, and strategic clinical and financial improvement.

The Analytics Solutions Certified Program offers professional training for vendors to educate and build strategy around the Maturity Models.
